

GLOBAL ALL STAR TEAMS CELEBRATED AT 2025 CHEERLEADING AND DANCE WORLD CHAMPIONSHIP

April 29, 2025 – The U.S. All Star Federation (USASF) and the International All Star Federation (IASF) are proud to announce the newly crowned champions of The Cheerleading Worlds® and The Dance Worlds™, which took place April 25–28, 2025, at Walt Disney World® Resort in Orlando, Fla.

The Cheerleading Worlds® was hosted at the ESPN Wide World of Sports® Complex, while The Dance Worlds™ was held at Disney's Coronado Springs Resort & Convention Center. These premier events represent the pinnacle of international All Star cheer and dance competition, drawing the world's most elite teams and athletes to perform on a global stage.

This year's events welcomed approximately 13,000 athletes from over 900 teams representing 28 countries. Competitors earned the right to perform at Worlds by receiving bids at sanctioned events throughout the 2024–2025 season. Athletes competed in a range of divisions, showcasing exceptional skill, creativity and athleticism in front of a global audience.

"Each year, The Cheerleading Worlds® and Dance Worlds™ bring together the most talented athletes from around the globe. The energy, commitment and skill on display are inspiring. It's a privilege to support an event that continues to elevate our sport and unite the international All Star community," said Steve Peterson, vice president of USASF Events & Corporate Alliance.

"We celebrate all the teams who represented their countries and clubs with pride"

Congratulations to the following medalists who earned top honors.

About The Cheerleading Worlds® and The Dance Worlds™

The Cheerleading Worlds®, held annually since 2004, and The Dance Worlds™, held since 2007,

are premier international competitions for All Star cheer and dance teams. These events

celebrate the highest level of performance and sportsmanship in the global All Star

community. The 2026 Cheerleading and Dance World Championships will take place at Walt

Disney World Resort April 24-27.
